

freedom[®]

Winner of 10 international design awards for its many revolutionary features and unparalleled ease of use, Freedom's groundbreaking design is the gold standard by which other chairs are judged.

freedom[®]

Designed by Niels Diffrient

Niels Diffrient's designs are grounded in the philosophy of form flowing from function. His work has spanned generations, consistently looking past trends to reinvent the tools we use for daily living. Diffrient channels his knowledge of engineering, architecture, and human factors into the creation of highly functional and aesthetically timeless designs.

Freedom to Move

The Freedom chair was designed specifically to encourage frequent, spontaneous changes of posture. There are no locks and no tension springs to negotiate. In their place are elegant mechanisms that automatically support your body in every position you'll assume throughout the day.

What Makes Freedom So Revolutionary

1 Automatic Headrest

Freedom's dynamic, position-sensitive headrest adjusts to cradle your head and neck as you recline, and moves out of the way when you sit upright automatically.

2 Recline Action

As you recline, you'll maintain a near-constant eye level, while the angle between your torso and legs opens up for better body function.

3 Contoured Cushions

The cushions are sculpted to closely follow body contours, which increases contact and decreases concentrated loads. Our optional Technogel® seat cushion maximizes weight distribution and comfort.

4 Responsive Backrest

The pivoting backrest automatically adapts to the changing needs of your spine during recline.

5 Synchronous Armrests

Freedom's body-friendly gel armrests move up and down together and stay with you during recline, always keeping you in supported balance.

6 Body Fit

The seat, backrest and headrest may be independently positioned to fit your exact body size.

7 Intelligent Mechanism

With Freedom's revolutionary counter-balance mechanism, your weight automatically balances the force required to recline the chair. So whether you're big or small, short or tall, the recline tension is always perfectly adjusted to let you move while keeping you fully supported in all positions.

“ Chairs reflect the character of their designer. Niels Diffrient is clever, pragmatic, honest, personal and generous. I sit on his Freedom Chair every day and it makes me optimistic about the value of design.”

—*Rob Forbes, Founder of Design Within Reach*

Saddle Seat

The Freedom Saddle is the most comfortable and versatile stool ever made. Its unique triangular cushion encourages users to sit in a “saddle” posture, which lowers the thighs, opens up the hips and puts the spine into a healthy lordotic curve. This position also reduces pressure points for long-term comfort.

The Freedom Saddle is equally at home in an office, lab or industrial setting, and its multi-use cushion can accommodate the many sitting positions required for countless applications. Whether it’s used all day long or tucked under a desk for impromptu meetings, the Saddle offers a unique and comfortable seating solution unmatched by any other stool.

Freedom and the Environment

Humanscale is committed to environmental sustainability and continually strives to design, engineer and manufacture products that—compared to others in the same class—consume less of the Earth’s limited resources.

In addition to supporting sustainability through superior design, Humanscale is a major contributor to and maintains an active partnership with World Wildlife Fund.

The Freedom Chair is a great example of Humanscale’s environmental purpose.

- Made predominantly of aluminum, followed by steel and plastic
- Contains 62% recycled content (43% post-consumer, 19% pre-consumer)
- 90% recyclable
- Weighs only 35 lbs.
- Made of 132 parts (comparable chairs are made of up to 250 parts)
- Modular cushions for easy replacement
- Designed for easy disassembly
- Ships in 40% recycled packaging, or blanket-wrapped when feasible
- Greenguard Certified

LEED® Credit

The Freedom chair is Greenguard-Certified and can help a project achieve LEED-CI certification in a number of areas. Consult your Humanscale representative for additional information on earning any of the LEED-CI credits detailed here.

Proud Supporter of:

Humanscale Performance Textiles

Humanscale's diverse selection of fabric, leather and leather alternative textiles far exceed performance standards for contract upholstery, and most are specifically designed to meet the demanding requirements of our award-winning seating. In keeping with our commitment to the environment, Humanscale works exclusively with mills that maintain sustainable manufacturing practices.

The Critics Have Spoken

"For the last few years, the gold standard in office seating has been set by the Freedom chair by Humanscale."

—*New York Times*

"The jurors were awed by the mechanics, wowed by the comfort and overcome with excitement about the possibility of changing the contract-seating market forever."

—*ID Magazine*

"Five stars! Worth every cent, the Freedom task chair removes at least the physical discomfort of your workday."

—*Business 2.0*

"Elegantly and effortlessly, the Freedom chair is changing the way people sit and the way people think about furniture."

—*Buildings*

"This ergonomic office chair feels so good, the two of you will want to get a room."

—*Popular Mechanics*
